

TASK – 9

share an Amazon Machine Image (AMI) from one AWS account to another.

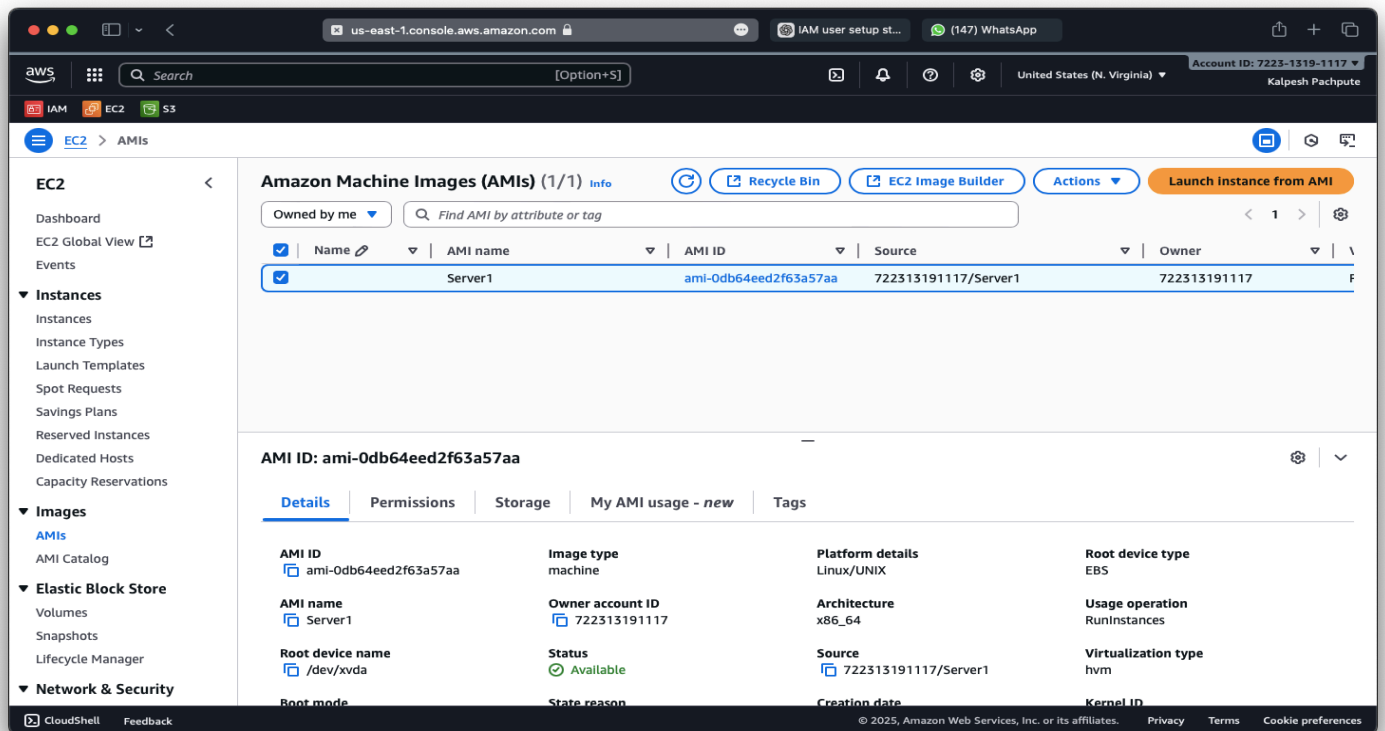

Step 1 – Create the AMI

1. Go to EC2 → Instances.
2. Select the instance to create an AMI.
3. Click Actions → Create Image (AMI).
4. Enter a name, then click Create image.

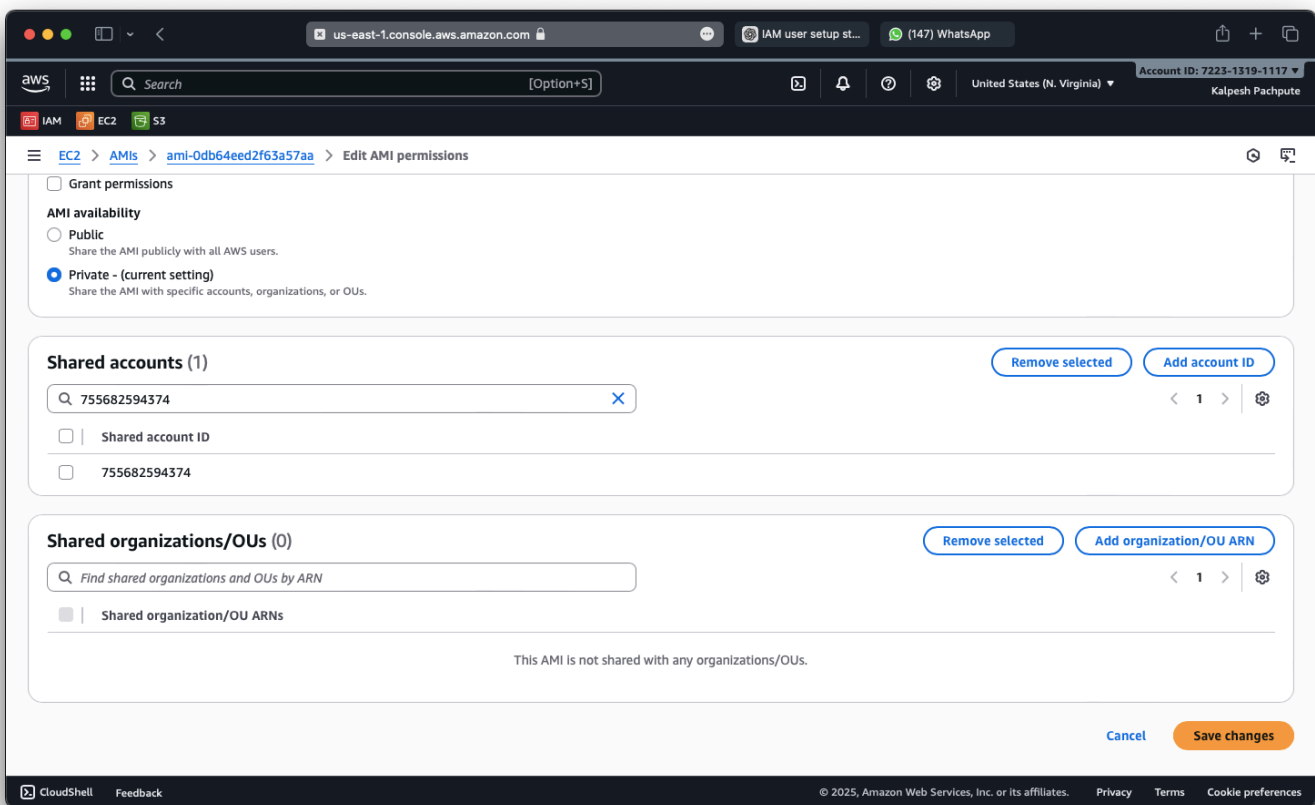

Step 2 – Go to images

1. choose the AMI.
2. Click Actions.
3. Choose Edit AMI permissions.

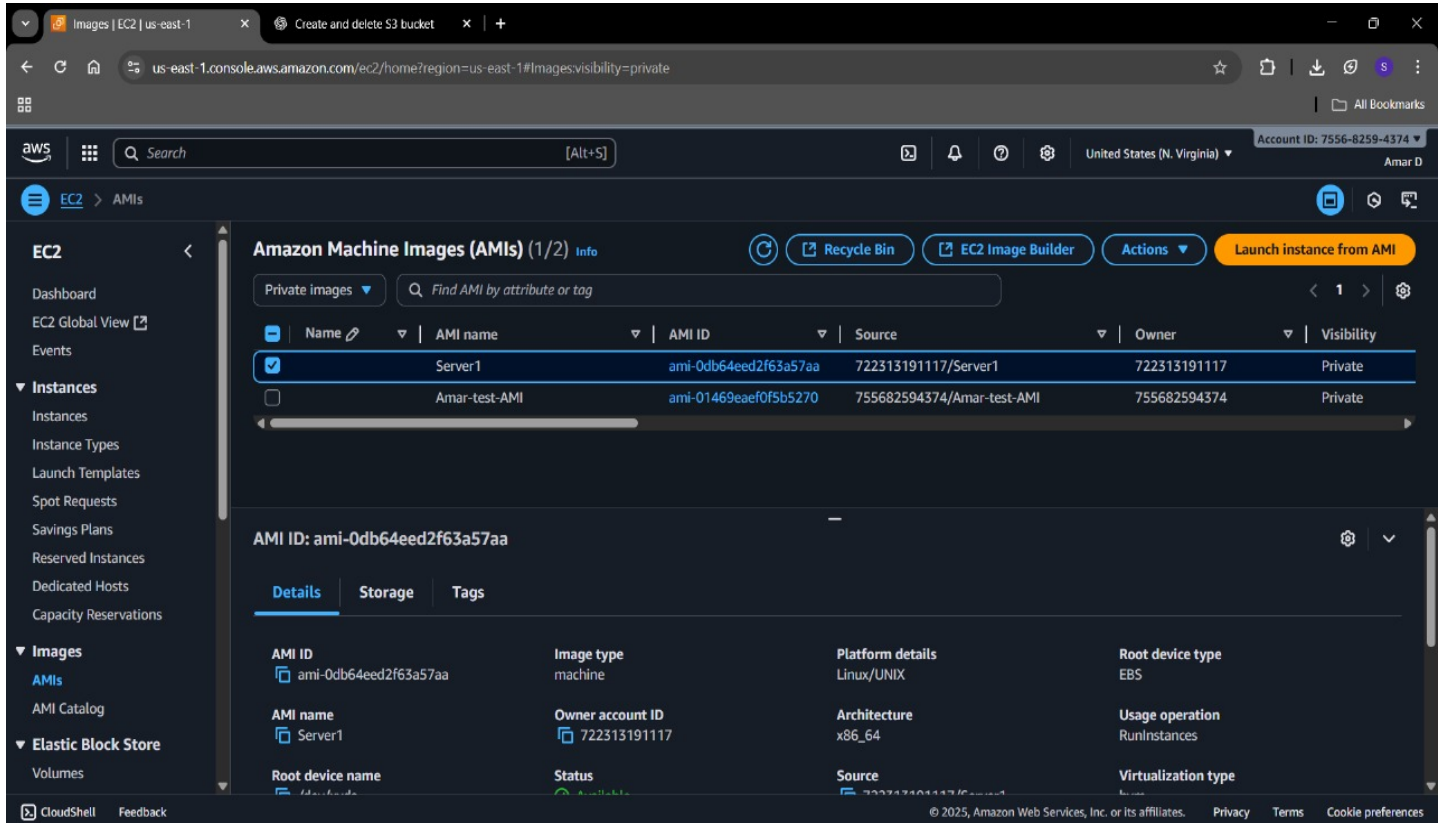

Step 3 – Edit AMI Permissions

1. Click Actions → Edit AMI permissions.
2. In the Shared accounts section, enter the AWS Account ID of the other account.
3. Click Save changes.

Step 4 – Access from Target Account

1. Log in to the other AWS account.
2. Navigate to EC2 → AMIs → Private images.
3. Find the shared AMI by AMI ID.

The screenshot shows the AWS Management Console for the 'us-east-1' region. The left sidebar is open, showing the 'EC2' section with 'AMIs' selected. The main content area displays the 'Amazon Machine Images (AMIs) (1/2)' page. The 'Private images' filter is active. A table lists two private AMIs:

	Name	AMI name	AMI ID	Source	Owner	Visibility
☒	Server1		ami-0db64eed2f63a57aa	722313191117/Server1	722313191117	Private
☐	Amar-test-AMI		ami-01469eae0f5b5270	755682594374/Amar-test-AMI	755682594374	Private

Below the table, the details for the selected AMI (AMI ID: ami-0db64eed2f63a57aa) are shown. The details are organized into four columns:

AMI ID	Image type	Platform details	Root device type
ami-0db64eed2f63a57aa	machine	Linux/UNIX	EBS

AMI name	Owner account ID	Architecture	Usage operation
Server1	722313191117	x86_64	RunInstances

Root device name	Status	Source	Virtualization type
ami-0db64eed2f63a57aa	Available	722313191117/Server1	Paravirtualized
